**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-33, drawn to an energy recovery system, from subclass 60/597.

Group II, claim(s) 34-50, drawn to a radial inflow turbine unit, from subclass 415/159.

Group III, claim(s) 51-68, drawn to a bearing, from subclass 384/536.

Group IV, claim(s) 69-87, drawn to a rotary magnetic coupling, from subclass 464/29.

Group V, claim(s) 88-100, drawn to a method carried out in an energy recovery system, from subclass 60/615.

Group VI, claim(s) 101-111, drawn to a working fluid purification system, from 210/636.

The groups are not so linked as to form a single general inventive concept (Rule 13.1 PCT) for the following reasons:

There is no link between the inventions claimed in claims 1, 34, 51, 69, 88 and 101 in terms of the same or corresponding "special technical features" that define a contribution that the claimed invention considered as a whole makes over the prior art.
